Zenit

Switch to endless possibilities

Zenit, a global solution for the British Standard market.

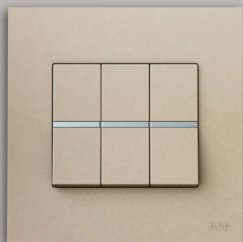

Zenit is the most comprehensive modular range in ABB's wiring accessories portfolio.

Its renowned design has been featured in residential and commercial buildings worldwide growing a path of reliability and success.

All this encompassed in a beautiful design and with the guarantee of a brand renowned for its quality such as ABB

One solution for every application

Never has your home been so comfortable, safe, efficient and beautiful. Today's modern living spaces demand comfort in every room, whether it's the bathroom transforming into a wellness spa or kitchens becoming communication islands. Zenit offers solutions for future-oriented lifestyle in residential living.

Ultra-slim design

Ultra-slim (4,0 mm) frame design that blends into the surface of the wall

Top-level quality in sustainable materials

High durability polycarbonate and metal support result into a wear-proof product with outstanding aesthetics.

Safety first

Our products are fitted with embedded safety features such as double-pole switching, child-friendly shutters or twin-earth terminals.

Made in Europe

Zenit is made in the ABB wiring accessories factory in Oiartzun (Spain).

Create your own space

A balanced palette of colors

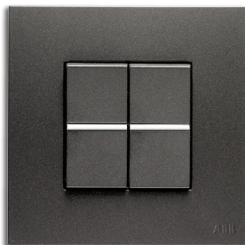

Zenit bs is available in four colors: White (BL), Silver (PL), Anthracite Grey (AN) and Champagne (CV).

Whether it is a warm living space or a productive office area, the palette of colors will fit the needs of any interior design.

Furthermore, functions and frames can be combined to create your own design.

BL White

AN Anthracite

PL Silver

CV Champagne
